

## IDEA导入Jar包

### 方法1：

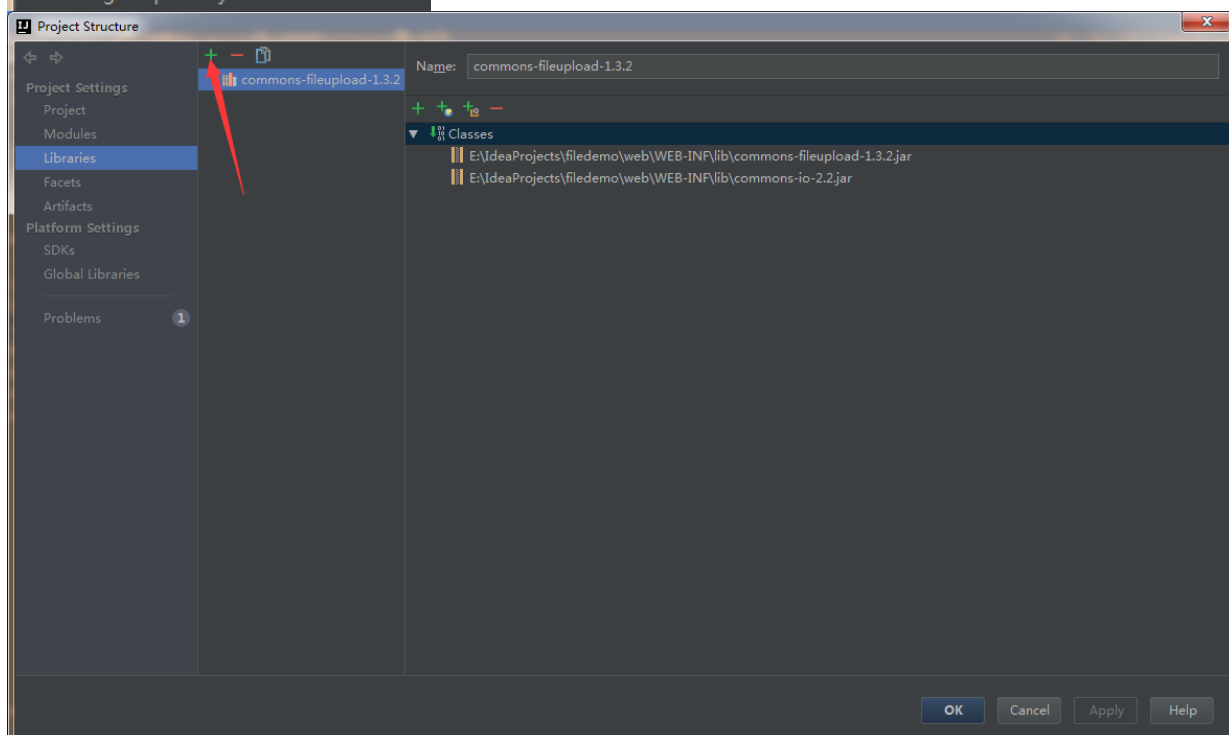

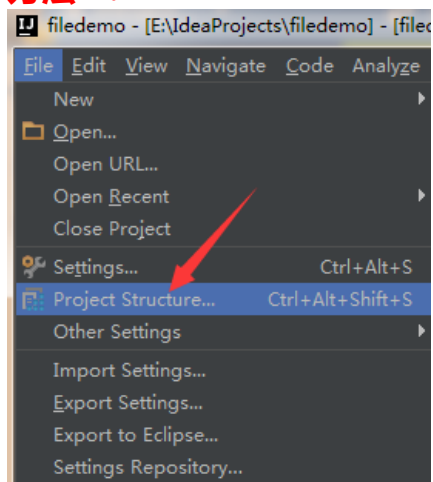

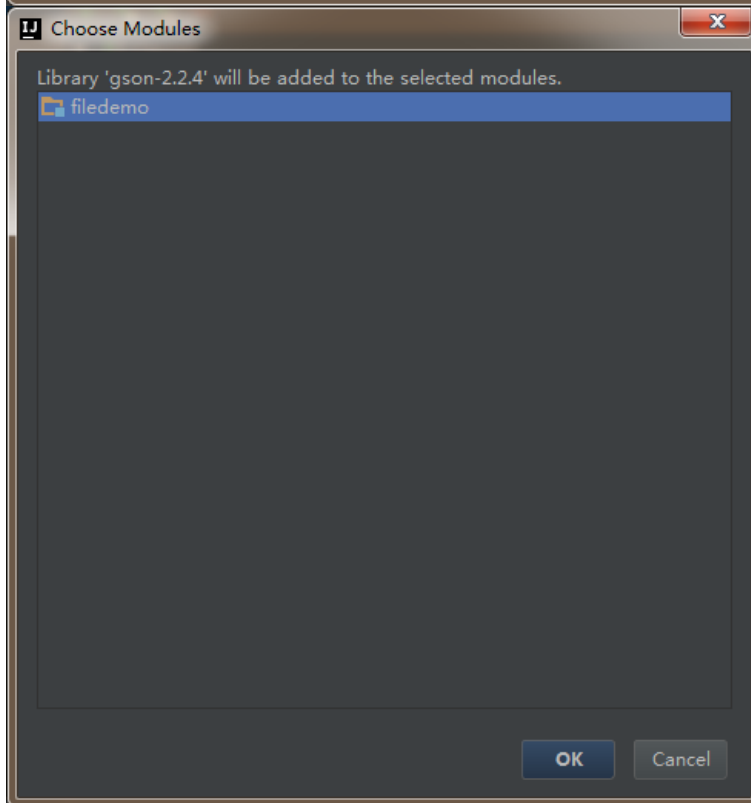

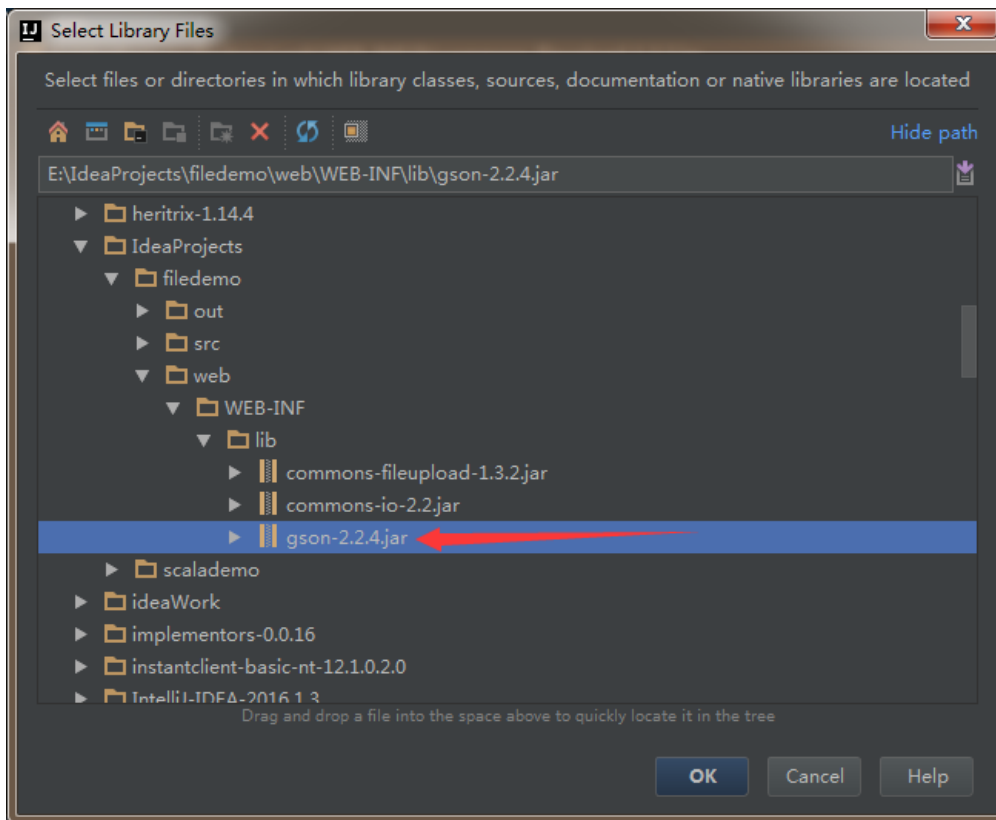

创建lib目录，并将你需要添加的jar包复制到lib目录下，然后按住Ctrl键选中多个需要添加的Jar包，鼠标右键选择--> Add as Library

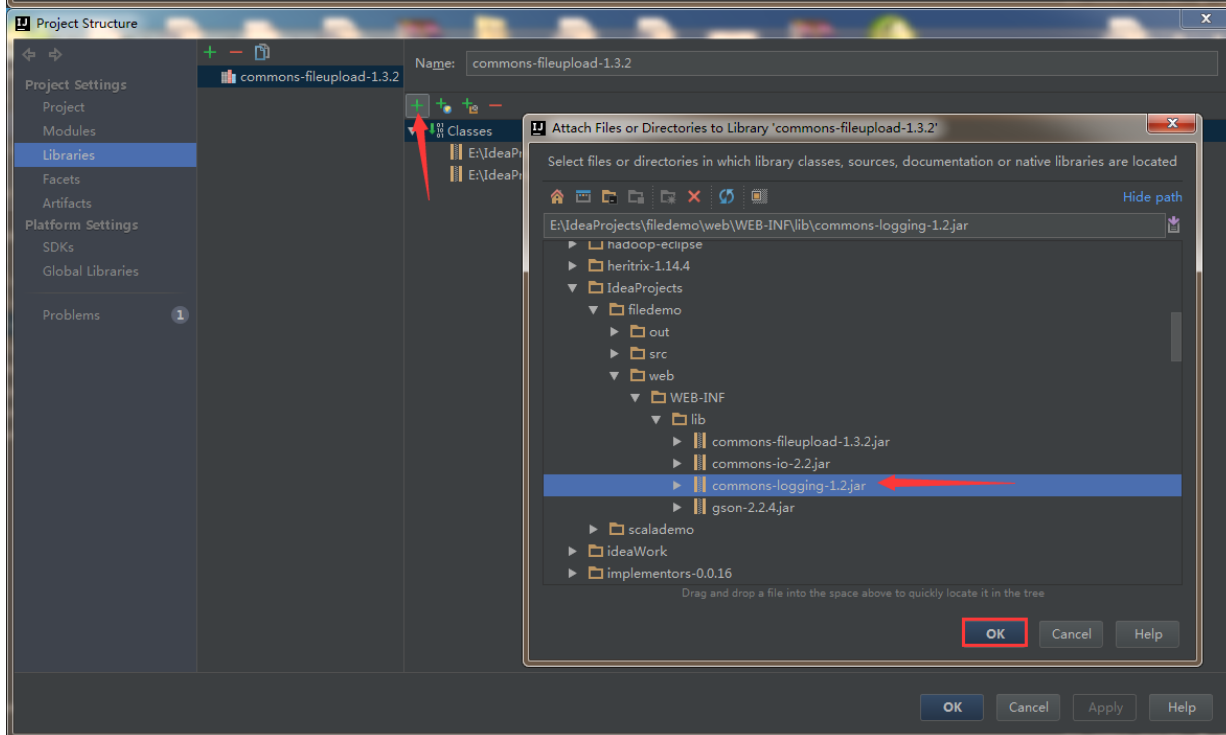

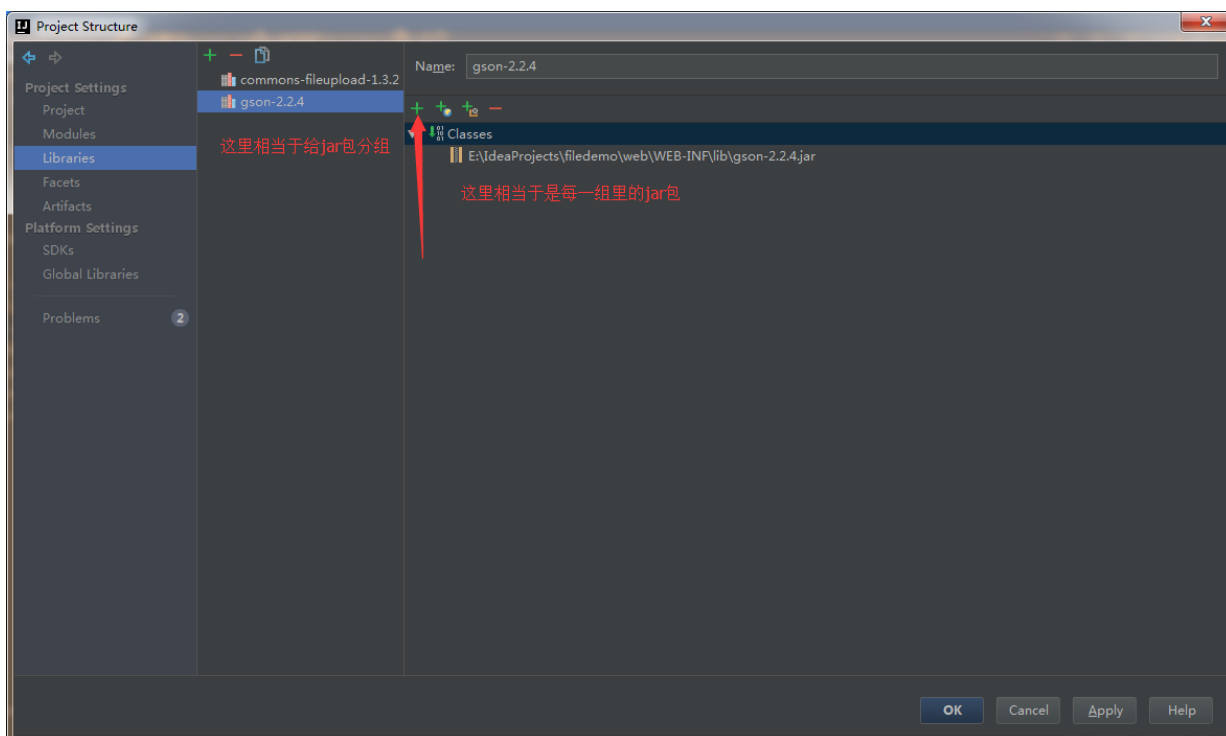

这样就可以将选中的多个jar包添加到Classpath下。这种做法类似Eclipse里的Add to Build Path。

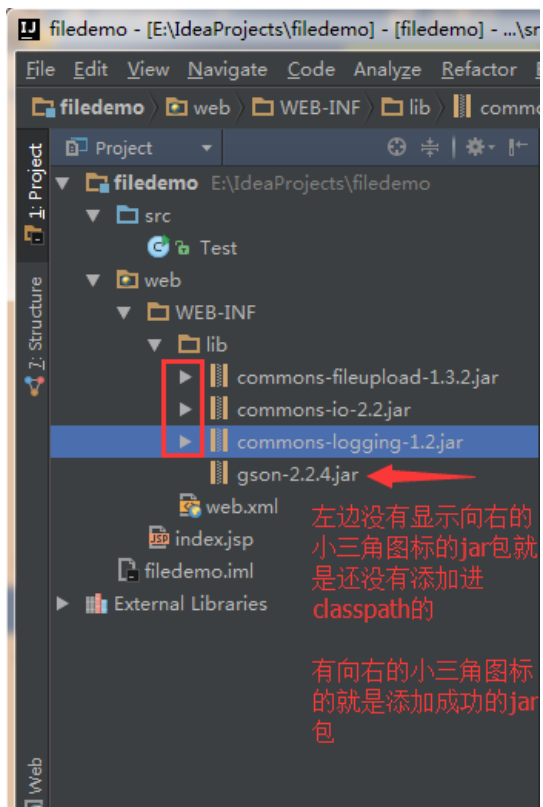

## 方法2：

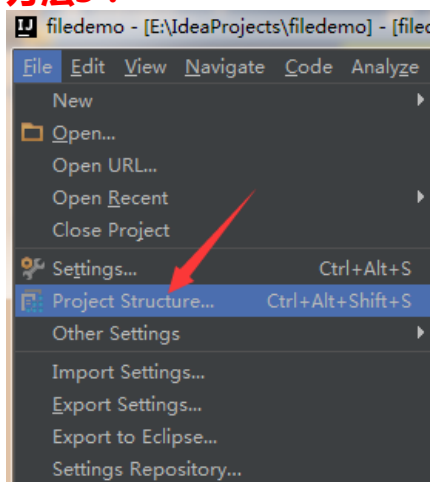

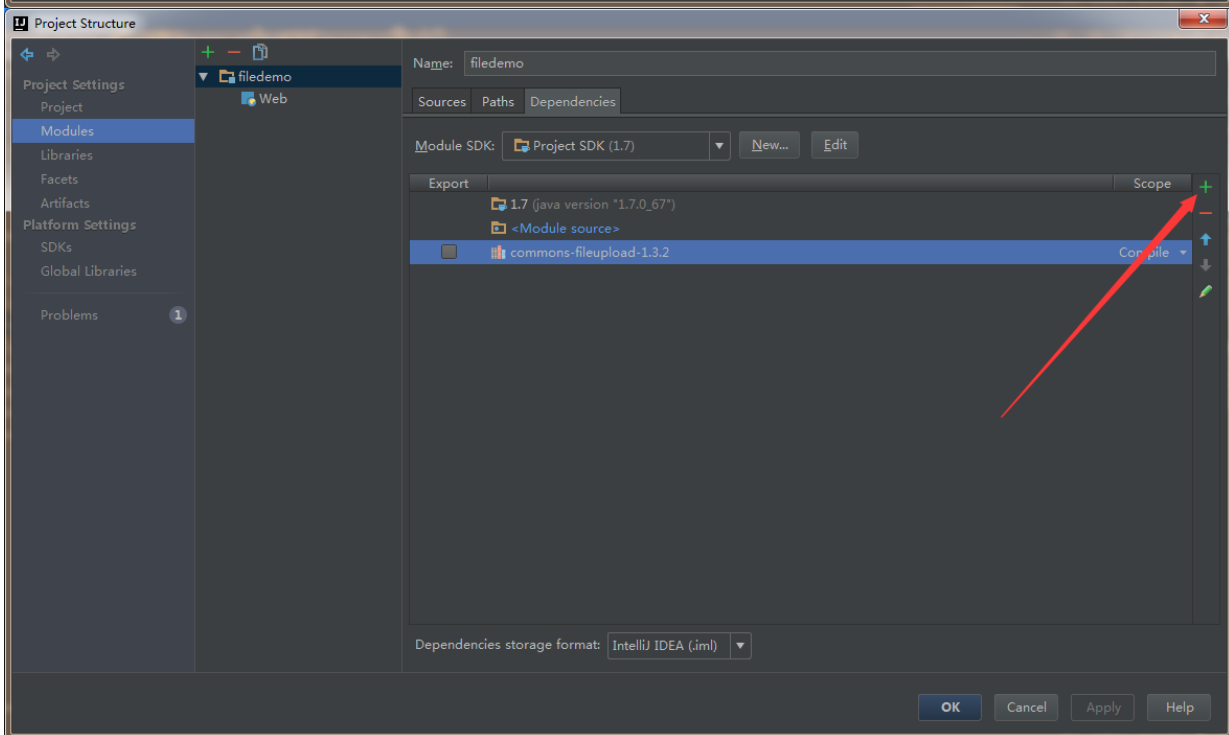

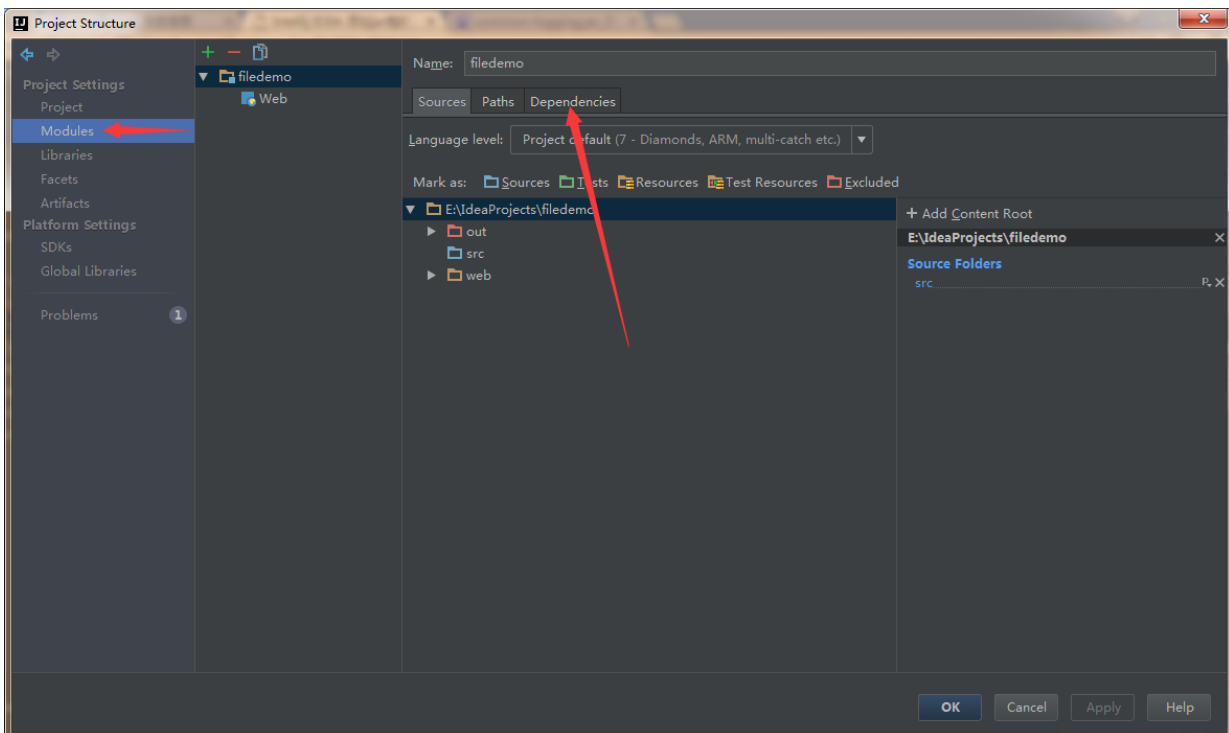

也可以在每一组内添加jar包

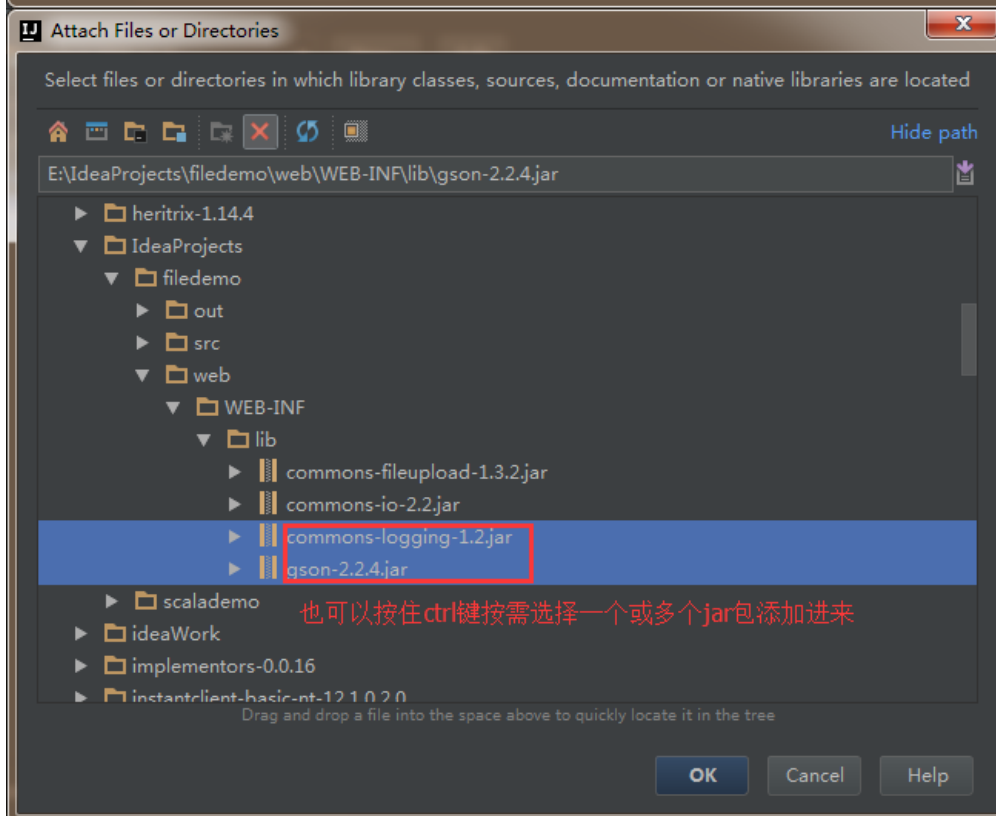

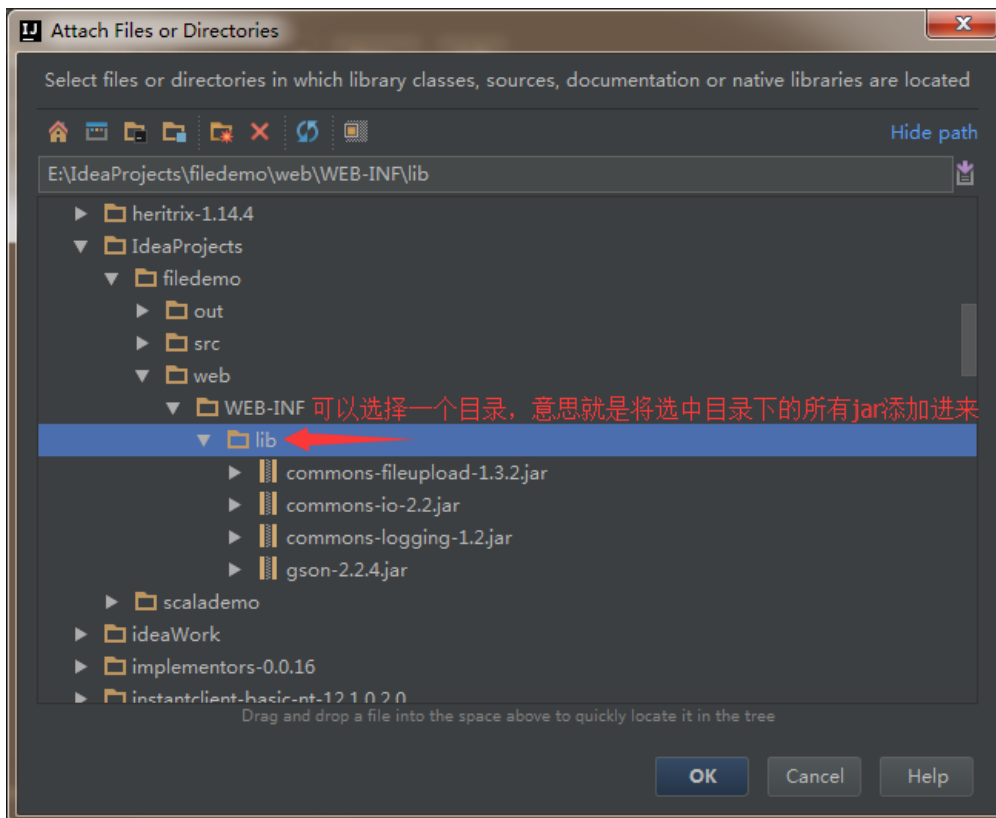

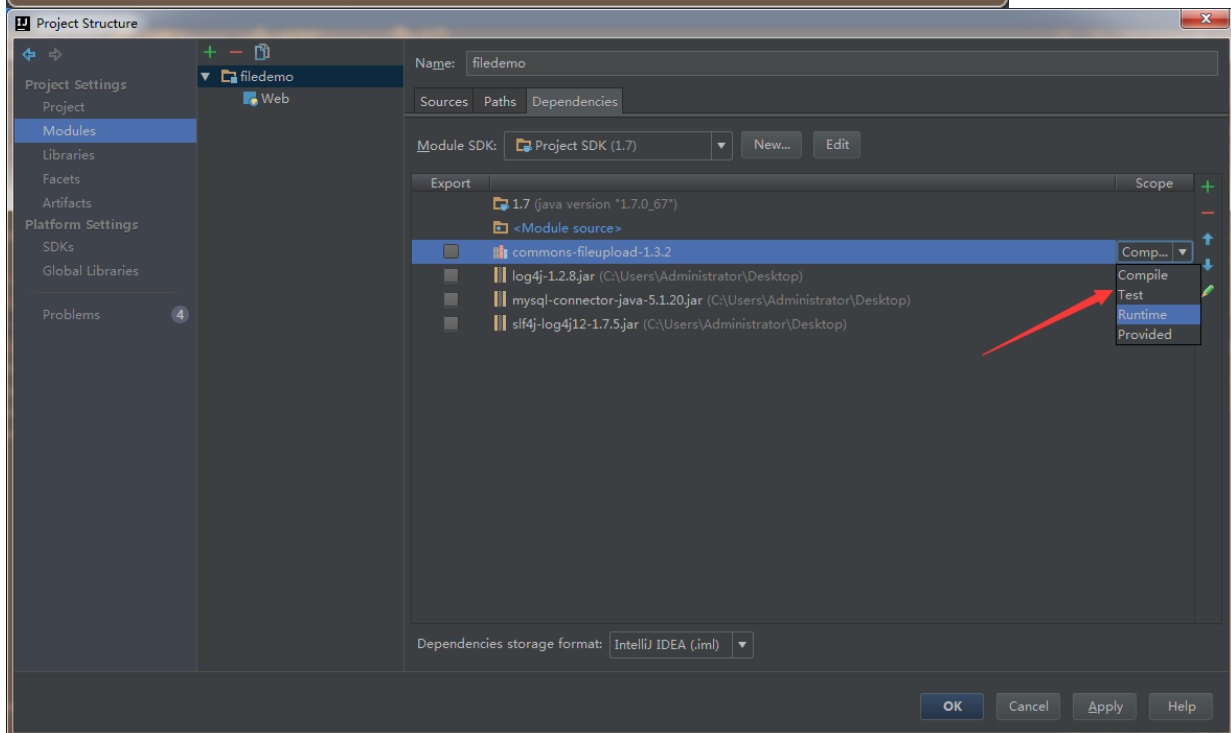

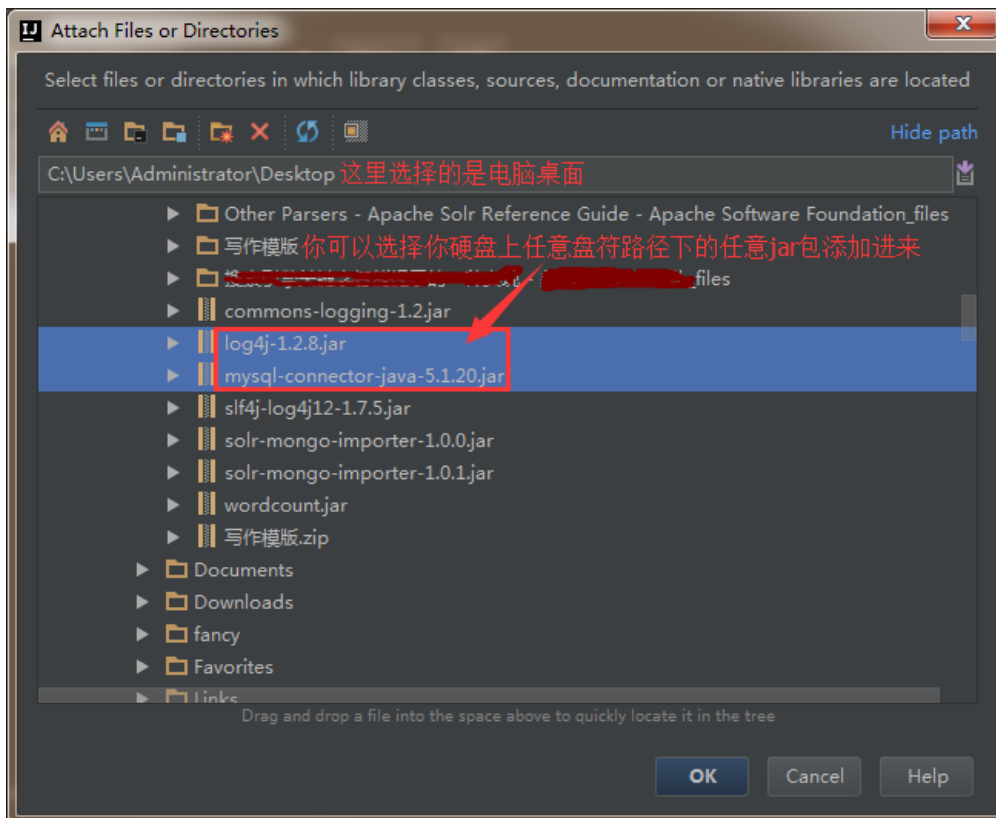

### 方法3：

在这里可以设置每个jar包的依赖关系，默认都是compile级别依赖即编译期就依赖此jar包。
